

YOU CAN HELP PREVENT PRESCRIPTION DRUG MISUSE BY KEEPING YOUR MEDICATIONS SAFE!

86% of Missouri college students do not misuse prescription drugs.*

HOW TO KEEP YOUR MEDS SAFE

USE AS DIRECTED

Taking a higher or more frequent dose than prescribed can be dangerous. If you have concerns about your prescription speak with your health care provider.

KEEP MEDS LOW-PROFILE

Don't be ashamed of using medications but keeping your medication on the down low can prevent theft and pressure to share.

STORE OUT OF SIGHT

Store your medications in a locked box or cabinet out of sight. You can get a **FREE** medication locking cap by ordering from rx.missouri.edu/order

DON'T SHARE WITH ANYONE

Medications prescribed to you are for you alone and can have very dangerous effects on those you share with! It is also illegal to share your medications with others.

PROPERLY DISPOSE

Take old and unused medications to your local drop-box or take-back event! You can find information about local resources at rx.missouri.edu/resources
